Profile:

Full stack developer with experience with Angular and React. I have a passion for excellence in ux/ui design with 5+ years of professional experience in a dynamic team environment focused on building web applications that are intuitive, improve user interaction and create company-changing efficiencies.

Skills & Technologies:

Angular	Javascript	Photoshop	AWS	Docker
React	Typescript	Illustrator	Agile	MongoDB
Node	PHP	XD	Git	MySQL

Experience:

Continuum Health Solutions
Jan 2013 - Present

Full-Stack Developer
Feb 2020- Present

Currently working on converting legacy php applications to angular/php (yii framework) applications while gaining experience with docker and aws environments.

Front-End Developer & UX/UI Designer
Sept 2017-Feb 2020

Used Angular 4/5 6/7, Bootstrap, and Material to build in-house web-based applications with Restful API interfacing for everyday employee use. Led the process to re-think, re-design, and build new tools for staff to use daily, utilizing previous company knowledge and shadowing of current employees.

Project Manager
June 2015 - July 2018

Working with company executives and development team to both improve system efficiencies and implement new tools. Organized and maintained tasks for new client implementations. Collaborated with client executives and managers for implementations and maintaining daily operations.

System Analyst
Jan 2015 - Dec 2016

Learned and re-thought data processing for Continuum while spending time understanding and gaining a knowledge of the technical aspects of the business through data processing and SQL reporting.

Education:

DU Fullstack Bootcamp, Mar 2020

Colorado Christian University, Lakewood, CO
Bachelor of Arts, Biblical Studies. Graduated Spring 2012.
